PROFESSIONAL SUMMARY

Certified AI Automation Engineer with hands-on experience designing and deploying production-ready automation systems using n8n, Make.com, Groq AI, Pinecone, and LangChain. Specializes in RAG architecture, conversational AI, and end-to-end workflow automation that reduces manual effort and operational cost. Delivered 10+ automation workflows across client and capstone projects with a 98% success rate.

CORE SKILLS

Automation: n8n, Make.com, Zapier, Webhooks, API Integration

AI & LLMs: Groq AI, LangChain, HuggingFace, Prompt Engineering, AI Agents

Vector DBs / RAG: Pinecone, RAG Architecture, Embedding Pipelines

Integrations: Gmail API, Telegram Bot API, Google Sheets, Google Drive, Google Docs, ClickUp, Supabase, PostgreSQL

Programming: JavaScript

Deployment: Netlify, Vercel, GitHub

PROFESSIONAL EXPERIENCE

AI Automation Engineer (Certification Program), 10Alytics Business

Jan 2026 – Mar 2026

- Designed and deployed a RAG-powered Internal Knowledge Advisor (n8n, Pinecone, Groq AI) with document-only, zero-hallucination responses and full source attribution, cutting document search time by 60% and saving teams 2–3 hours per week.
- Built an automated lead-qualification workflow with AI-driven scoring, deduplication, and CRM routing logic, reducing manual review time by 70%.
- Developed NovaCore Policy Advisor, a conversational AI system with persistent memory and live Google Docs integration, delivering instant, accurate policy answers.
- Created a Smart Student Application Portal with multi-stage filtering and automated email/team routing, cutting administrative workload by 50%.
- Shipped a self-contained, browser-based Video GenAI App using the HuggingFace Inference API with zero backend infrastructure, replacing the need for \$200+/month in paid tools.
- Engineered a Document Reader & Knowledge Pipeline automating Google Drive ingestion, embedding generation, and Pinecone vector storage.
- Delivered 10+ automation workflows across client and capstone projects, maintaining a 98% success rate.

PROJECTS

- Adaeze Telegram Chatbot** — n8n, Groq LLaMA 3, Google Sheets, Telegram: AI chatbot with lead logging; NTTS entry.
- RAG Internal Knowledge Advisor** — n8n, Pinecone, Groq AI: document-grounded Q&A with source attribution.
- n8n Trading Bot (Phase 1)** — n8n, Binance Testnet, Supabase/PostgreSQL, Telegram: SMA crossover signal bot.
- NovaCore Policy Advisor** — n8n, Groq AI, Google Docs: conversational policy assistant with persistent memory.
- Video GenAI App** — HuggingFace Inference API, JavaScript, Netlify: zero-backend AI video generator.
- Social Media & Blog Content Pipeline** — n8n, Groq AI, Google Sheets: automated content for a live education blog.
- Student Internship Application Portal** — n8n, Gmail API, Google Sheets: routes applicants and sends emails.
- Automated Sales Lead Bot** — n8n, JavaScript, Gmail API, Google Sheets: AI scoring, deduplication and routing.
